## The System

Our floating system is designed to be simple: the blocks are held together strongly and firmly by specially designed mounting screws. All pieces are lightweight and provide easy handling.

The cubes are suitable for any shoreline. They are adaptable and can be assembled to create any shape and size - no limit for the configuration options!

# Jet Sliders

<https://www.esc.guide/post/jet-slider>

# Jet Sliders

The **Jet Slider** is made of efficient new-generation HDPE (high-density polyethylene).

**BulDock Jet Slider** is a unique dry dock system.

The **Jet Slider** is lightweight, but thanks to its' technology, it is resistant to impact, chemical products, UV rays and severe weather conditions.

Its' exceptional design prevents any disproportionate strain on the hull by distributing the watercraft's weight evenly.

The **Jet Slider** does not feature any moving parts that might be damaged or would require maintenance.

2022BG009	2022BG010	2022BG011	2022BG012

Specially designed for oversized and heavy boats more than 1000 kg. BulDock advise is customers to include one T-Beam in appropriate dimensions to the Boat Slider system to achieve bigger buoyancy and stability. For heavier boats, need to install two T-Beams to the Boat Slider. **⚠️ For maximum efficiency of the T-Beam, we recommend the installation of the T-Beam through Anchoring Pins.**

## Aluminum Gangway with Handrails
